Your go to contract manufacturer

Happy New Year!

Enrinity has achieved another milestone—it is now an **FDA inspected facility!**

Ever since its inception, Enrinity has focused on providing the highest quality dietary supplements for its customers. 2015 was a busy year at Enrinity. We have provided consultations on a number of new formulations, and have produced close to 125 products.

The highlight of the year was Enrinity obtaining **UL/NPA cGMP certification**. The certification is a milestone Enrinity has been striving for. Enrinity passed these rigorous requirements with flying colors! Congratulations to the Team for their commitment to quality!

2016 has started with even higher level of excitement. Enrinity had an unannounced visit from an FDA inspector. After observing Enrinity's operational and QA/QC processes, the FDA inspector commended the Owners for their pharma grade facility, and adherence to protocols with consumer safety in focus.

We are thankful to our dedicated team, our customers and our vendors for continued support!
